

Matt Leete | Product Designer

ABOUT

I am a human centred designer, creating meaningful and delightful experiences that transform the way that people interact with technology. I have an interdisciplinary background that spans across design, technology and research, and have applied this experience to projects that range from digital strategy, through to detailed interaction design.

EXPERIENCE

KPMG, Sydney – Senior Consultant

Jan 2022 – Present

- Managed internally funded engagement to build MVP for KPMG AI tool.
 - Managed design team and contributed to MVP product strategy, ideation and wireframe build
 - Managed technical team building solution architecture
 - OUTCOMES:
 - MVP selected for continued internal funding and identified as global priority
 - Product development moving to full build
- Led CX team creating innovative customer experience framework for financial services client product with approx \$100B funds under management
 - Facilitate discovery and ideation workshops
 - Develop customer experience journey map and customer experience framework
 - OUTCOMES:
 - Client returned for follow-up CX and UX engagements
 - Framework implementation prioritised in client's strategic roadmap
- Managed marketing and comms engagement for indigenous organisation.
 - Review of current state EDM process and tech stack
 - Review marketing process with in-house legal team and comms SME
 - Test proposed workflow and tech stack with key client stakeholders
 - Deliver optimised EDM process guide working with revised tech stack.
 - OUTCOMES:
 - Documented 50% reduction in work hours required to complete EDM tasks
 - 70% reduction in ongoing EDM related subscription costs
 - Project delivered on time and 10% under budget

- Developed brand strategy for financial services client including redefining the brand territory and initial proposals for creative direction.
 - OUTCOMES:
 - Membership increase by 57,000 in FY25
 - Funds under management increase approx 20% FY25
- Conducted research into KPMG global internal product design and development process, interviewing 50+ executive level stakeholders and product owners.
 - Delivered current state journey map from ideation through to GTM.
- Undertook UX review and digital strategy for NSW government including departments
 - Managed junior designer and junior researcher across project
 - Planned research & led interviews with executive level stakeholders, technical leads, design leads and strategy leads.
 - Planned and led analysis of 40+ hours of interviews.
 - Conducted heuristic analysis of key existing digital assets, identifying key assets for user testing
 - Planned and led user testing, resulting in a high level understanding of overarching UX issues, and a detailed and prioritised backlog of features for review.
 - Delivered unified outline of strategic goals, tech requirements, current painpoints, risks and opportunities.
- Designed Holistic customer experience strategy and roadmap for gov client
 - Planned and co-facilitated client workshop with exec and senior stakeholders
 - Developed guiding design principles
